

## Workshop on “Social Collaborative Internet” SCI-2015

---

### Call for Papers

#### Motivation

Beyond a platform for casual social interaction and for marketing research and broadcasting, social networks are rapidly also becoming a powerful tool for collaboration, innovation, coordination and problem solving. Social networks are now used to report crimes to law enforcement agencies, monitor health epidemics, issue community warnings, and lately also to connect devices in a social network-based Internet of Things. We refer to the augmented use of social networks for collaboration between people, as well as between machines, as the Social Collaborative Internet. This international workshop on Social Collaborative Internet (SCI-2015) focuses on the crossroads between scientists, researchers, industry practitioners and students from diverse domains in social networking, communications and the Internet of Things. Its purpose is to attract novel contributions on the analysis, design, modeling, implementation and evaluation of technologies that can support the Social Collaborative Internet. For this, the workshop will focus on the following issues:

- How to effectively utilize and evaluate social network and media data for public safety and emergency response?
- Visualization and analytics techniques for social network and collaboration data
- How will the introduction of machine-to-machine communication in social networking affect security and privacy?
- Performance, effectiveness and efficiency of collaboration through social networks.
- Applications of social networks for supporting personalized information and improvement of quality of life (i.e. e-health, e-gov)
- Extension of the social network concept, to include non-human participation (i.e. Socially inspired paradigm for machine to machine communication)
- Prototyping and standardization of interaction over social networks, (i.e. use of terminology, mapping to standards)
- Convergence of Internet of things and Social networks towards a Social Internet of Things.

#### Topics

Researchers are encouraged to submit original research contributions in all major areas, including, but not limited to:

- Social network collaboration paradigms
- Social network use by Law Enforcement Agencies
- Social networks in the Health sector
- Volunteerism in social media
- Social network analysis and mining
- Computational social networks
- Security and privacy in social networks
- Trust management in social networks
- Next generation of social networks
- Social Internet of things / Social network of intelligent objects
- Machine to machine social networking

## Submissions

Authors are required to submit fully formatted, original papers (PDF), with graphs, images, and other special areas arranged as intended for the final publication. Authors are required to submit fully formatted, original papers (PDF), with graphs, images, and other special areas arranged as intended for the final publication, not submitted to any other conference/workshop at the same time. All final submissions should be written in English with a maximum paper length of six (6) printed pages (10-point font) including figures without incurring additional page charges (maximum 1 additional page with over length page charge of USD100 if accepted). Papers exceeding 7 pages will not be accepted at EDAS. Only timely submissions through EDAS will be accepted for review. Standard IEEE conference templates for LaTeX formats are found at here: [http://iee.org/conferences\\_event](http://iee.org/conferences_event)

You may also use one of the following templates for Microsoft Word: A4, US letter. Only PDF files will be accepted for the review process, and all submissions must be done through EDAS.

## Schedule

Submission deadline:	July 1, 2015
Acceptance notification:	September 1, 2015
Final workshop paper due:	October 1, 2015

## Organising Committee

**Charalampos Patrikakis,**

*TEI of Piraeus, GR*

Email: bpatr@teipir.gr

**David S. Ebert,**

*Purdue University, USA (IN)*

Email: eberrd@ecn.purdue.edu

**George Loukas**

*University of Greenwich, UK*

Email: G.Loukas@greenwich.ac.uk

**Veronique Pevtschin**

*Engineering Ingegneria Informatica S.p.A. (IT)*
